Course on Fundamental UI Design Principles

UX Specialist Course

Iran Brand Academy

Brand executive management(Brand MBA)

Kish Mehr Technical Vocational Institute

International Certificate in Technical Supervision of Printing

DATE OF BIRTH

May, 1984 – 40 years old

Skills & Expertise

SKILLS AND EXPERTISE:

1. User and Market Research

One of my key skills is the ability to understand users' needs and desires and analyze the market. Through user research, market trends, and analytical data, I design products that align with real user needs and maintain a competitive edge in the market.

2. Conceptualization and Ideation

By employing creative methods such as Design Thinking and ideation sessions, I assist teams in finding innovative and compelling solutions to complex problems. I develop initial concepts and prototypes using advanced design tools like Figma, Sketch, Adobe XD, and InVision.

3. UI (User Interface) and UX (User Experience) Design

Designing products with a user-centered approach is one of my top priorities. I create unique and visually engaging user experiences that are not only attractive but also functional and intuitive. Based on UX/UI design principles and usability testing, I ensure users can interact with the products seamlessly.

4. Collaboration with Technical and Development Teams

A strength of mine in product design is close collaboration with technical and development teams. Acting as a bridge between design and technical teams, I ensure that the designs are implemented correctly and align with technical standards and user expectations.

5. Project Management and Leading Cross-Functional Teams

I am capable of managing and leading cross-functional teams, overseeing projects from ideation to final delivery with precision and well-organized planning. My experience in managing complex projects and tight timelines has helped bring high-quality products to market on time.

6. Continuous Testing and Improvement

After product delivery, I continue to gather user feedback and use the collected data to make continuous improvements. This process helps businesses optimize their products to meet the evolving needs of the market and users.

KEY ACHIEVEMENTS AND EXPERIENCES:

Designed and developed digital products in various sectors, including technology, e-commerce, financial services, transportation, and more.

Collaborated with both large and small teams to create products with exceptional user experiences, increasing customer satisfaction and loyalty.

Participated in multinational projects and worked with international companies and startups to develop products that have been launched in global markets.

Experienced in designing products for both mobile and web platforms, resulting in increased engagement and conversion rates.

I am always eager to learn new technologies and cutting-edge methods in product design and take pleasure in applying creative and efficient solutions to solve complex challenges. My goal is to help businesses create products that are not only profitable but also provide valuable experiences for users.

Experience

EBCOM (MY MCI)

Head of Product Design Team

Head of QC Support Team

Head of Customer Experience Team

My Activities

Led and developed the Product Design Team, focusing on creating seamless, aesthetic, and user-centered experiences across digital products, including the Ewano and MyMCI (Hamrah Man) applications.

- Managed the end-to-end design process, from user research and ideation to prototyping, usability testing, and final delivery to development teams.
- Collaborated closely with product managers, developers, and marketing teams to ensure alignment between design objectives, business strategies, and user needs.
- Directed the Customer Experience (CX) Unit, leveraging user behavior analytics, feedback insights, and process optimization to improve overall satisfaction and engagement.
- Designed and implemented a Voice of Customer (VoC) framework to collect, analyze, and translate user feedback into actionable insights for continuous product improvement.
- Managed the QC Support Unit, responsible for monitoring and evaluating support team performance, ensuring response quality, service consistency, and customer satisfaction.
- Developed and executed Key Performance Indicators (KPIs) to measure response accuracy, resolution time, and user satisfaction with support interactions.
- Collaborated with Support, CX, and Product teams to identify service gaps, improve operational workflows, and enhance the quality of user interactions.

Omid Analyst

(provider of algorithmic trading)

Head of Product Design Team | Brand Consultant

My Activities

At TahliGar Omid, I was responsible for designing and developing innovative trading systems that allow users to engage in buying and selling stocks using advanced technologies. My activities included the following:

1. Design of Omid Plus Trading System:

This system, presented as both a website and an application, provided the first opportunity in Iran for the general public to buy and sell stocks using intelligent algorithms. The goal of this design was to create a simple and efficient user experience, allowing users to easily navigate the capital market.

Achievement:

This system received widespread acceptance and significantly increased the number of new users and daily transactions.

Achievement:

A 30% increase in website visitors and a significant improvement in the conversion rate of new customers to active users.

2. Design of Group Online System:

I also worked on designing a group online system using advanced algorithms for brokerage firms and portfolio managers. This system enables brokerages and portfolio managers to simultaneously analyze and manage investment portfolios, facilitating group trading for specific clients using algorithms.

Achievement:

This system helped brokerages achieve a 35% improvement in the efficiency of managing their investment portfolios, resulting in increased customer satisfaction. Additionally, the designed algorithm reduced the number of staff in trading rooms at brokerages, thereby decreasing salary costs for these firms

3. Responsibility for All Design Phases:

I was responsible for all phases of the design of these systems, including user analysis, competitor analysis, testing, and design. This process involved gathering data, identifying user needs, and examining competitors' performance to provide the best possible solutions.

Achievement:

This comprehensive approach ensured that my designs aligned more closely with real user needs, leading to products that met the highest standards of performance and user satisfaction.

Rabin Brokerage

(Stock Exchange)

Head of Product Design Team | Brand Consultant

My Activities

1. Online Stock Trading Product Design (Web Application and Web)

- Designed and developed a functional and secure platform for online stock trading.
- Enhanced user convenience and accessibility to the stock market.

Achievement:

Increased the number of active users and volume of online transactions.

2. Design of Robin Brokerage Website

- Established a professional and user-friendly website to provide financial services and information to clients.
- Improved user experience and website ranking in Google search results.

Achievement:

Increased site traffic and user conversion rates.

3. Visual Identity Design for Robin Brokerage

- Developed a cohesive and modern visual identity for Robin Brokerage.
- Created a recognizable and credible brand in the stock market.

Achievement:

Strengthened brand image and increased customer trust in the company.

4. Design of the First Instant Payment Gateway System in the Iranian Stock Market, "Robin Pay"

- Designed and implemented an innovative system for instant fund depositing and withdrawing in the stock market.
- Improved the payment process and reduced the time required for customer financial transactions.

Achievement:

Increased customer satisfaction and efficiency in stock transactions.

5. Visual Identity Design for Robin Pay Payment Gateway

- Created a modern and professional visual identity for the Robin Pay payment gateway.
- Enhanced user trust in the online payment capabilities of the system.

Achievement:

Increased usage of the Robin Pay system and strengthened its market position.

Sahamyab

The largest stock market social network in Iran.

Head of Product Design Team | Brand Consultant

My Activities at

1. Responsive Design and Website Update for Sahamyab

The responsive design and update of the Sahamyab website aim to enhance user experience and ensure easier access to services across various devices. These changes were implemented based on competitor analysis and user research.

Achievement:

- Increased user engagement
- Improved user satisfaction and experience
- Strengthened Sahamyab's position in the online market

2. Design of Stock Trading Platform "Neo Broker"

Development of a modern platform for buying and selling stocks named "Neo Broker," available in both website and app formats. This platform provides users with an easy and swift trading experience, incorporating advanced features to streamline trading processes

Achievement:

- Increased user base and growth in customer pool
- Enhanced trading volume and liquidity
- Promotion of innovation in digital financial services

3. Design of Educational Platform "College"

Creation of a stock market educational platform named "College," which includes a variety of courses and educational resources aimed at improving users' knowledge of the stock market and investment practices.

Achievement:

- Increased awareness and knowledge among investors
- Attraction of new users and expansion of target market
- Heightened user trust in platforms and strengthened brand connection

4. Design of Customer Club Website

Launch of a dedicated customer club website to provide special facilities and benefits to loyal users. This site enhances interaction between users and platforms while offering a unique experience to customers.

Achievement:

- Increased user loyalty and satisfaction
- Provision of added value and a sense of belonging to the brand
- Enhanced user-centric interactions

Farabi Brokerage

(Stock Exchange)

Senior Product Designer | Brand Consultant

My Activities

1. Design of the Main Website of Farabi:

The development of the main website for Farabi Brokerage was one of my key projects. With the goal of creating a user-friendly and efficient experience, the website was designed so that users could easily find the information they needed and utilize various services. The modern and responsive design of this website increased user engagement and reduced the time needed to access information.

Achievement:

A 30% increase in website visitors and a significant improvement in the conversion rate of new customers to active users.

2. Design of the Farabi Customer Club Website:

To strengthen relationships with customers, I designed the Farabi Customer Club website. This site allows users to benefit from special services and rewards, as well as participate in various club activities.

Achievement:

Created an active community of loyal customers who maintain ongoing engagement with the company and a 40% increase in user interaction with the club's special services.

3. Design of the Educational Website "Amoozin":

To enhance the financial knowledge and skills of customers, I designed and launched the educational website called "Amoozin." This platform includes online courses, webinars, and educational resources to help users familiarize themselves with the concepts of the capital market.

Achievement:

Attracted over 1,000 users in the first month and improved the financial knowledge of users, resulting in an increase in their trading activities.

4. Organizing Conferences and Seminars:

With the aim of sharing knowledge and experience in the capital market, I organized various conferences and seminars. These events provided opportunities for direct interaction with customers and offered up-to-date information on market trends.

Achievement:

Increased customer awareness and strengthened brand trust, leading to a 25% improvement in registrations and trading activities.

5. Brand Consultant:

As a brand consultant, I developed marketing and branding strategies to strengthen the identity of Farabi Brokerage in the market. This included crafting brand messages and effective communication strategies.

Achievement:

Enhanced brand recognition among customers and increased the brokerage's credibility in the market, resulting in significant growth in the number of new clients.

6. Visual Identity Design:

I was responsible for developing the visual identity of Farabi Brokerage by designing the logo, color schemes, and appropriate graphic elements. This visual identity helped create a strong and memorable image of the brand.

Achievement:

Established a cohesive and appealing visual identity that differentiated the brand in the market and increased brand recognition among target audiences.

Soshyant

(Financial Tech)

Head of Product Design Team

My Activities

1. Design of the First Dedicated Stock Trading Platform in the Iranian Stock Market with Global Standards (App and Web)

Development and design of a specialized and secure platform for stock trading, compatible with international standards in user interface and user experience design, available as both a web and app version.

Achievement:

Increased active users, improved transaction volume, and enhanced customer satisfaction through an optimized and integrated user experience.

2. Design of Soshyant Company's Website Based on Global Standards

Creation of a professional and user-centric website for Soshyant Company, adhering to global web design standards, providing high accessibility, performance, and efficiency.

Achievement:

Increased brand awareness, higher site traffic, and improved user engagement and conversion rates.

3. Design of Dericoins Cryptocurrency Exchange Platform (Operating in the Market as Mazdax)

Development of the Dericoins cryptocurrency exchange platform, now operating under the name Mazdax, ensuring compliance with international standards in security, performance, and user experience.

Achievement:

Established the platform's position as a trusted brand in the cryptocurrency market, attracted a wide user base, and strengthened brand credibility.

Chista

Information Technology Development

Senior Product Designer | Brand Consultant

My Activities

1. Responsive Design for Chista Website

Responsive design for the Chista website based on user research and competitor analysis. The goal is to enhance user experience and ensure easy access to services across various devices.

Achievement:

- Increased user engagement
- Improved user satisfaction and experience
- Increased traffic and accessibility on multiple devices

2. Design and Implementation of the Most Comprehensive Electronic Map of Iran

Design and implementation of the most comprehensive electronic map of Iran, named "National Map Viewer of Iran," featuring the most accurate details and geographic information with location, business search, and precise navigation capabilities. It provides users with complete and practical information about locations.

Achievement:

- Providing accurate and reliable information to users
- Increased usage of the map as an information source
- Strengthened Chista's position in geographic information technology
- Helping businesses gain more visibility
- Encouraging the use of a domestic map over foreign ones

3. Design of Passenger Transportation Platform "JaBeJa"

Design of the "Ja Be Ja" platform for passenger transportation across Iranian provinces, utilizing modern technologies. This platform allows users to experience convenient and fast transportation services.

Achievement:

- Increased user base and improved service delivery
- Enhanced quality of transportation services in provinces
- Strengthened user relationships and increased satisfaction
- Job creation for drivers and job security

4. Design of Real Estate Buying and Selling Platform

Creation of a real estate buying and selling platform designed as both an application and a website, enabling users to easily search, view, and purchase properties.

Achievement:

- Increased property transactions
- Improved access to information and options for buying and selling
- Enhanced user experience and streamlined transactional processes

5. Visual Identity Design for Chista

Design of Chista's visual identity to establish a strong and recognizable brand in the market. This includes a logo, colors, and visual elements that reflect Chista's values and objectives.

Achievement:

- Created brand recognition and differentiation in the market
- Increased user trust and credibility in the brand
- Strengthened emotional connection with audiences and customers

Thnx!

Thank you for your thoughtful perspective, dear friend.
